

Dear Mr Jenny

As discussed on the phone today, We can no longer find the reference to the FIPS 140 requirements.

SwissSign strongly recommends to refer in section 3.3.9 of the "Technische und administrative Vorschriften über Zertifizierungsdienste im Bereich der elektronischen Signatur" Version dated 1.6.04 to the FIPS 140-2 certification of crypto devices.

For more information about security requirements about hardware devices such as Smartcards and tokens please have a look at the FIPS home page <<http://www.itl.nist.gov/fipspubs/>> and look for regulation number 140.

Sincerely yours

--
