

Annex IV: Frequency assignment application

Applicant.....

Frequency blocks (lots) are bindingly and irrevocably applied for in the respective amount shown in the table below from the 800 MHz, 900 MHz, 1800 MHz, 2100 MHz and 2600 MHz bands.

Bidding category/ band	Available lots	Lot size	Minimum bid per lot (CHF)	Eligibility points per lot	Number of lots applied for	Resulting eligibility points = <#Lots applied for> x <bid factor>
Category A: 791-821MHz paired with 832-862MHz	6	2x5 MHz	21,300,000	6		
Category B: 880-915MHz paired with 925-960 MHz.	7	2x5 MHz	21,300,000	6		
Category C: 1710-1785MHz paired with 1805-1880MHz	1	2x10 MHz	16,600,000	4		
Category D: 1710-1785MHz paired with 1805-1880MHz	13	2x5 MHz	7,100,000	2		
Category E: 1900-1920MHz	1	1x5MHz	4,150,000	1		
Category F: 1900-1920MHz	3	1x5MHz	2,700,000	1		
Category G: 1920-1980MHz paired with 2110-2170MHz	3	2x5MHz	8,300,000	2		
Category H: 1920-1980MHz paired with 2110-2170MHz	9	2x5 MHz	5,400,000	2		
Category I: 2500-2570MHz paired with 2620-2690MHz	14	2x5 MHz	8,300,000	2		
Category J: 2570-2615MHz	3	1x15MHz	12,450,000	3		
Category K: 2010-2025MHz	1	1x15MHz	12,450,000	0		No bidding entitlements are assigned in category K

1. Note

1. Bindingly and irrevocably means that if there is no scarcity of frequencies in all the bands put out to tender (i.e. if the first stage of the auction does not take place), the applicant must accept unconditionally and irrevocably the frequency blocks applied for at the minimum price. Otherwise, the information provided here concerning the frequency requirements determines eligibility points, i.e. the extent of the bids which can be made in the auction (cf. Section 5.2 and 2.2.3 of the main document and Section 1.2.5 of the auction rules).
2. To ensure competition in the national telecommunications market after the auction, the licensing authority has defined the following spectrum limits:
 - total 2x25 MHz over the two categories A (800 MHz) and B (900 MHz); i.e. the category A and B frequencies acquired must not exceed 2x25 MHz in total;
 - 2x20 MHz in category B (900 MHz);
 - total 2x30 MHz over the two categories G and H (2.1 GHz paired)
 - total 2x35 MHz over the two categories C and D (1.8 GHz)
 - maximum 2x135 MHz of the total available FDD spectrum (categories A, B, C, D, G, H and I).

2. Total number of eligibility points

In accordance with the information in the above table, the sum of the resulting eligibility points in the individual categories A - J produces a total number of eligibility points applied for in the amount of in words

.....
.....

3. Amount of the bank guarantee

According to the frequency requirement information for categories A-K in the table above, and in accordance with Section 5.3 and Annex V of the tender document, the amount which needs to be guaranteed by the bank is CHF in words.
