# **Telecommunications Statistics**

# **Questionnaire 2023**

DO NOT FILL IN THIS DOCUMENT
Please complete the online questionnaire

### Information about the questionnaire

The questionnaire on telecommunications statistics is available in four languages (German, French, Italian and English) and can be accessed online using personal access codes. We strongly recommend that you use this method to complete the questionnaire. If you have any questions, please write to us at <a href="telecomstatistics@bakom.admin.ch">telecomstatistics@bakom.admin.ch</a>. For more information, visit <a href="factsheet and statistical documentation for TSPs">factsheet and statistical documentation for TSPs (admin.ch)</a>.

Please note that the statistical data may not be used without your consent for any changes to your registration as a TSP or for OFCOM's monitoring activities. For changes to your registration, you can use the relevant service on the eGovernment portal at <a href="https://www.uvek.egov.swiss">www.uvek.egov.swiss</a> or inform the section concerned by email to <a href="mailto:tp-nd@bakom.admin.ch">tp-nd@bakom.admin.ch</a>.

### Scope and definition

This questionnaire is intended for all telecommunications service providers (TSPs). In accordance with Article 3 letter b of the Telecommunications Act, a telecommunications service is defined as an information transmission service on behalf of third parties using telecommunication techniques (Art. 3 let. b TCA). The transmission of audiovisual programme services, i.e. the transmission of programme services intended for the general public, forms part of telecommunications services (in accordance with Art. 1 para. 2 and Art. 2 let. g of the Federal Radio and Television Act of 24 March 2006 (RTVA; CC 784.40)).

Answer the following questions to determine the parts of the questionnaire to complete and return:					
1. Are you the owner of connections on fix	xed services?		No		Yes, complete section IF on page 4
2. Do you sell to other TSPs resources an wholesale market)?	nd/or services on fixed networks (cf.		No		Yes, complete section <b>ARS</b> on page 5
3. Do you offer public telephone services	on fixed networks to end users?		No		Yes, complete section SF-1 on pages 6 and 7
4. Do you offer fixed- or variable-rate trans	smission services to end users?		No		Yes, complete section SF-2.1 on page 8
5. Do you offer access to internet services	s to end users?		No		Yes, complete section SF-2.2 on page 8
6. Do you transmit live or recorded audiov	visual programme services to end users?		No		Yes, complete section SF-3 on page 9
7. Are you a holder of a licence for the proservices?	ovision of mobile telecommunications		No		Yes, complete section <b>IM</b> on page 9
8. Do you offer public telephone services users?	on terrestrial mobile networks to end		No		Yes, complete section <b>SM-1</b> on pages 10 and 11 and <b>SM-3</b> on page 13
9. Do you offer transmission services on terrestrial mobile networks to end users?			No		Yes, complete section <b>SM-2</b> on page 12
10. Do you offer telecommunications services on satellite radiocommunications networks?			No		Yes, complete section <b>SS</b> on page 13
11. Do you put on the market grouped offerings intended for end users?			No		Yes, complete section <b>SG</b> on page 14
Grouped offerings: Initially, it is necessary to notify each service separately in its category. Then the grouped offering must be notified in section SG. For example: Company X offers a contract including fixed telephony and television for a basic lump-sum price. In this case, it should complete sections SF-1, SF-3 and SG.					
You <u>must</u> complete: Section XT – Information on the company in the technical domain, page 3 Section XF – Information on the company in the financial domain, page 15 Section P – Personnel numbers, page 15					

Section F - Financial data, pages 16, 17 and 18

You may enter any comments you may have in parts RT (page 14) and RF (page 18).

#### IF Fixed network infrastructure

IF-1a Active connections (NTP¹) deployed for telecommunications services to third parties (end users and TSPs), which are the property of the TSP up to the network separation point² (as of 31.12)

Copper pair connections		
Number of optical fibre connections (FTTB, FTTC, FTTS)	IF71	
Number of other connections	IF72

Of which, number of communications established to the <b>number 147 (telephone helpline for children and young people)</b>	SF14.32
Of which, number of communications established to other <b>short numbers</b> used for offering services to the public (without 18xy numbers)	SF14.44

### SF-2 Transmission services

#### SF-2.1 Services on fixed or variable transmission capacities

SF-2.1 Services on fixed of variable transmission capacities	
Leased line services or transmission capacities offered to active end users <sup>8</sup> (as of 31.12)	
≤ 2 Mbit/s (number of units <sup>9</sup> )	SF21.61
> 2 Mbit/s (number of units <sup>10</sup> )	SF21.62
SF-2.2 Internet Service Provider (ISP): TSP providing the internet service to end users	
Number of customers with internet access (as of 31.12)	SF22.1
Of which, those using analogue and/or ISDN connections (having accessed the internet between 0 <u>1.10</u> and 31.12)	SF22.2
Of which, those using co-axial cable connections	SF22.3
Of which with downlink transfer rate < 10 Mbit/s	SF22.12
Of which with downlink transfer rate ≥ 10Mbit/s and < 30 Mbit/s	SF22.13
Of which with downlink transfer rate ≥ 30Mbit/s and < 100 Mbit/s	SF22.13.1
Of which with downlink transfer rate ≥ 100Mbit/s	SF22.14
Of which, those using connections with DSL equipment (including FTTB, FTTC and FTTS)	SF22.4
Of which with downlink transfer rate < 10 Mbit/s	SF22.17
Of which with downlink transfer rate ≥ 10Mbit/s and < 30 Mbit/s	SF22.18
Of which with downlink transfer rate ≥ 30Mbit/s and < 100 Mbit/s	SF22.18.1
Of which with downlink transfer rate ≥ 100Mbit/s	SF22.19
Of which, those using optical fibre FTTH	SF22.10
Of which with downlink transfer rate < 10 Mbit/s	SF22.22
Of which with downlink transfer rate ≥ 10Mbit/s and < 30 Mbit/s	SF22.23
Of which with downlink transfer rate ≥ 30Mbit/s and < 100 Mbit/s	SF22.23.1
Of which with downlink transfer rate ≥ 100Mbit/s and < 1 Gbit/s	SF22.24
Of which with downlink transfer rate ≥ 1 Gbit/s and < 10 Gbit/s	SF22.30
Of which with downlink transfer rate ≥ 10 Gbit/s	SF22.31
Of which via other types of connection (excluding use of hotspots),	SF22.5
Other types of connection. Which? SF22.27	•
Volume of data downloaded by your customers (in thousands of Gbytes) during the period from 01.01 to 31.12	SF22.8
, , , ,	

<sup>&</sup>lt;sup>8</sup> Definition: Leased-line subscriptions refers to the number of dedicated private connections. A leased line connects two locations for the provision of a private voice and/or data telecommunication service. The leased line could either be a dedicated physical cable or a virtual connection that reserves a circuit between two points. It maintains a single open circuit at all times, as opposed to traditional telephone services that re-use the same lines for many different conversations. Leased lines most commonly are rented by businesses to connect branch offices, because the lines guarantee bandwidth for network traffic.

<sup>&</sup>lt;sup>9</sup> The number of units is the number of identical transmission capacities leased by a subscriber. Thus, if the latter leased 3 x 64 kBit/s connections, the number is 3.

Incoming capacity on your internet servers (estimated in Gbytes/day, during the period from 01.01 to 31.12)	SS12	Gbytes/day

<sup>&</sup>lt;sup>22</sup> The reseller resells SIM cards provided by the Mobile Network Operator (MNO) and has no relationship with customers apart from the sales of said cards. The telecommunication services are provided exclusively by the network operator.

<sup>&</sup>lt;sup>23</sup> The *service provider* (SP) generally has its own platform as far as basic services and billing are concerned, linked to the network of one or more MNOs. The SP can offer services under its own administration and itself define the terms of the contracts binding it to its customers.

#### SG **Grouped services**

**Definition:** Grouped services or grouped offerings are offers combining two or more telecommunications services (exclusively fixed telephony, fixed broadband internet, pay TV, mobile telephony and/or mobile data) offered by one or more associated providers which can be purchased jointly (one single wording and one a single price = pure bundles) or separately (taking advantage of non-temporary discounts and/or promotions granted for the additional service(s) = mixed bundles). Services that can only be marketed on condition that one or more other services are associated with them (= tied and tying services) are also considered.

Share of the preceding a	mount attributable to telecoms $^{26}$ (P3.5 = (P3.	4*FX) / 100)	P3.5	

#### Example:

In 2011, company Y had a turnover of Z francs. 70% (FX) of this turnover is attributable to the telecoms sector including RTV broadcasting activities where applicable, and 30% to other sectors in which the company is active. Company Y employed 100 people full-time. 50 worked directly and solely in the telecoms sector, 25 directly in other sectors and 25 worked simultaneously for all sectors. It is therefore necessary to enter 100 (P1.1), 50 (P1.2), 25 (P1.3), 25 (P1.4) and 18 (P1.5), 18 representing 70% of 25.

<sup>&</sup>lt;sup>24</sup> This is the balance in relation to the total (P.1.1, P2.1 or P3.1), i.e. persons who work simultaneously and directly in several sectors of activity as well as persons who handle common activities (management, language services, accounts, logistics, etc.).

<sup>&</sup>lt;sup>25</sup> To estimate this figure, take the amount shown in the previous line (P1.4, P2.4 or P3.4) and multiply by the percentage of total turnover attributable to the telecoms sector indicated on box (FX).

<sup>&</sup>lt;sup>26</sup> The number of posts occupied is equal to the sum of the different rates of occupation of the persons employed, a total which is then divided by 100. If certain persons are paid as a function of the number of hours worked, take the total hours worked in December and express it in terms of posts.

### F Financial data

### F-1 Operating revenue from activity in Switzerland

(in Swiss francs, figures for the accounting year; last trading year)

The first amount to be entered is the total, which will then be broken down into several items and sub-items. Please ensure that the sum of the items and sub-items is in fact equivalent to the amount of the heading category above them. For example, the amount entered under 1 must correspond to the sum of items 11, 12, 13, 14, 16, 17, 18 and 19. Finally, the "other" item corresponds to the difference between the sum of the sub-items and the amount for the item. If there is no difference, enter zero.

<sup>&</sup>lt;sup>27</sup> Turnover realised in Switzerland only.

<sup>&</sup>lt;sup>28</sup> Enter the turnover for the services listed in section SF-2.1 Fixed or variable transmission capacity services (page 8 of the statistics questionnaire).

<sup>&</sup>lt;sup>29</sup> Enter the turnover for the services sold listed in section ARS-5 Leased lines (transmission capacities) (page 5 of the statistics questionnaire).

#### Note:

Please read the following remarks carefully before completing the next three items.

Note that the purpose of the present questionnaire is to create statistics on the telecommunications sector in Switzerland. Consequently, only values in relation to this sector are of interest to us.

If your company is essentially active in the telecommunications sector (turnover equal to or greater than 90%), please complete the yellow boxes directly (those relating solely to the telecommunications sector).

If your company is active in sectors other than telecommunications and you know the values relating to the telecommunications sector alone (for example, because your company uses an analytical accounting system or because a cost analysis has been carried out), please complete the yellow boxes directly.

However, if your company is active in other sectors and you do not know all or some of the values relating to the telecommunications sector alone, please proceed as follows:

- 1) Enter the total value of the variable in the white box.
- 2) Estimate the proportion attributable to the telecommunications sector by applying the proportion of turnover indicated on page 14.
- 3) Enter the estimated amount in the yellow box.

You will find two examples in the appendix, one concerning a company essentially active in the telecommunications sector, the other relating to a company active in several sectors.

### F-2 Operational charges from activity in Switzerland

(in Swiss francs, figures for the accounting year; last trading year)

Please ensure that the sum of the items and sub-items is in fact equivalent to the amount of the heading category above them. For example, the amount entered under 221 must correspond to the sum of items 2211, 2212 and 2213. Finally, the "other" item corresponds to the difference between the sum of the sub-items and the amount for the item. If there is no difference, enter zero.

No-operating profit (financial profit and extraordinary profit), total value		fr
(Of which) non-operating profit attributable to the telecoms sector	F32	fr
Pre-tax profit <sup>31</sup>	F33	fr

<sup>&</sup>lt;sup>30</sup> The "operating profit, telecoms sector" is equal to the "net turnover (excl. VAT) attributable to the telecoms sector" less the "operational charges attributable to the telecoms sector (excl. VAT)", i.e. the value shown in box 1 on page 18 less the value shown in box 2 on page 19 and should equal box 31 on page 19.

<sup>31</sup> The "pre-tay profit" (hox 33 on this page) is equal to the "operating profit telecoms sector" plus "non-operating profit attributable to the telecoms sector" is a the

<sup>&</sup>lt;sup>31</sup> The "pre-tax profit" (box 33 on this page) is equal to the "operating profit, telecoms sector" <u>plus</u> "non-operating profit attributable to the telecoms sector", i.e. the value shown in box 31 plus the value shown in box 32 and should equal box 33 on the same page.

## F-4 Investments from activity in Switzerland

(in Swiss francs, figures for the accounting year; last trading year)

Please ensure that the sum of the items and sub-items is in fact equivalent to the amount of the heading category above them. For example, the amount entered under 4 must correspond to the sum of items 41, 42 and 43. Finally, the "other" item corresponds to the difference between the sum of the sub-items and the amount for the item. If there is no difference, enter zero.
