

Admission criteria for non-Confederation measures in the "Digital Switzerland" Action Plan

Status: 18 September 2018

The Federal Council is inviting interested organisations to publicise their projects via the "Digital Switzerland" Action Plan provided that they meet the following criteria:

- **Relevance:** the measure affects all parts of Switzerland or can potentially be implemented in all parts of the country;
- **Broad-based support:** the measure is supported by at least 2 participants from outside the Confederation;
- **Degree of maturity:** the measure is sufficiently mature and differentiates itself from a mere concept;
- **Quality:** the measure has a high degree of innovation and offers qualitative added value for the Swiss population and/or the Swiss economy;
- **Contribution to achieving the strategic objectives:** the measure can be subordinated to the core objectives and/or fields of action of the "Digital Switzerland" strategy;
- **Time-limit:** the measure has clear deadlines and is not designed as a long-term task.

The "Digital Switzerland" Business Office of the Federal Office of Communications (OFCOM) will decide on the inclusion of measures by external actors in the Action Plan in consultation with the competent federal administration offices.
