

Dear Mr. Jenny

Some brief comments on the document VZertES dated 1. Juni 2004.

Please regard the comments we made during our meeting in May 2004! in addition: The insurance issue is still not cleared. We need to get a "Bundesgarantie" as indicated in Art 2 Absatz 2

Art 5 Absatz 1 B is in direct support of the SwissSign documents "Certificate Content" and "Certificate Variables" please use as cross-reference.

Art 5 Absatz 2 Please delete entire text and do not replace. 6 Years is from a mathematical-crypto point-of-view not good and there is no enhanced value from this process... Please delete.

Art 12 Absatz 1 Passwörter, die... ..aufweisen. Is a technical requirement which is incomplete (one needs to specify that after 3 false entries the private key is permanently locked) and it really belongs in the BAKOM document not in the Verordnung. This applies to all technical elements in the Verordnung!

Art 13 Absatz 1 ...24 Stunden... is too long. The subscriber should perform the notification as soon as possible.

Sincerely

--

Joseph A. Doekbrijder
